Organized crime has a new 'freelance' option - and it's free VINCENTE CRONA | Associated Press

MORRISTOWN, N.J. (AP) — The Associated Press is bringing together coverage of organized crime, the mob, the Mafia and the questions they raise about how the U.S. government and the public view the phenomenon. The series will be written by the AP's national investigative team. The stories will be based on original reporting, public records, public officials and law enforcement officials. But the AP will also cooperate with police and federal agents in bringing additional investigative leads. Organized crime has evolved and has become a more sophisticated, global operation. The FBI and DEA have grown to unprecedented levels. Efforts to combat the problem have taken on a high-tech aspect, and the FBI and DEA are often heavily involved. The FBI's national organized crime unit is known as the National Security Information Program and provides services ranging from intelligence gathering to covert action. The unit says that more money was spent combating organized crime in the U.S. than all other federal law enforcement agencies combined. In New York City alone, federal authorities in 2009 estimated the Mafia's annual income at \$7 billion, roughly equal to the gross domestic product of the island of Malta. The AP's series will explore how the FBI has taken on organized crime as the threat it now represents. In the past, it said, the FBI has been reluctant to publicly name the top five Mafia bosses in the U.S. because it wasn't sure where they stood in the hierarchy. It has been easier to say that they were the most dangerous criminals in the country. Today

Gaze down at your floor at the end of a bright orange string. Squishies is a physics based puzzle game that follows a unique story that combines platforming, puzzles and a surprisingly vibrant world. The video provides a good overview of the game, as well as the developer, Bureau. Developer: Bureau Date: July 2017 On Oculus Rift, Oculus Quest and PlayStation VR Sculpture Studio PlayStation VR Digital Standard Version I bought it through PSNow, so the full price is £7.99 Reviewed using an Oculus Rift First Impressions It is very satisfying to crush jellyfish and mini-cutlers - though some of them feel pretty tough to smash. Despite a few complaints from my better half about the aforementioned cutlers, you can expect to successfully complete Squishies in under 30 minutes. The puzzles are standard fare, but they are clever and super fun to solve. Through clever design and combination of variables, you will successfully complete each puzzle with a minimum of frustration and while enjoying the entire process. My only gripe with the game is that my partner kept having to put down her headset as she felt nauseous as she played. So let's begin! Gameplay There are four main sections of gameplay in Squishies: 'Touchdown', 'Planetary', 'Barefoot' and 'Atlantis'. 'Touchdown' is your starting point and is the most basic of the four. At this point, the environmental hazards are easy to escape with minimal risk of death. We'll start by heading straight for the goal, which in this level is the floating jellyfish. You do not need to pick up the jellyfish as it will automatically float away, but you need to grab the small string of orange foam, which is connected to the jellyfish. After landing on the jellyfish, you can collect your jellyfish, which will lower the jellyfish to the ground and allow you to climb on top of it to start your next section. Next up is 'Planetary'. Here, your goal is to collect all the cutlers and bring them to the centre of the environment where you will light them on fire. You can freely walk anywhere in the area and use the virtual controls to move to and fro. 'Barefoot' is a little more d41b202975

Monday, January 27, 2011 As luck would have it, all of the speakers for next week's Lutheran Education Conference are colleagues and friends of mine. And since He is bold and wears a crown of thorns, He is taking of all comers. To serve Him faithfully, what more could a woman want? I await this windfall of education enrichment. In the meantime, I have two small kids, a single-foot-counting job, and will be feeling somewhat guilt-tripped and trepidatious about what's coming. So I'm taking inventory of these "small but mighty" blogs: poddie's wannabe - I'm pretty sure I've been here a thousand times. She has good intentions and rhetorical poetry. It is unclear if she has any plan to share this or any wisdom. On the other hand, she seems perpetually guilt-ridden. Maybe she really is writing for a Duke Ellington song? (I have not yet made this foolish assertion.) andrea - This bookish gal posts luscious pictures of books and dresses code-switching around referencing Renaissance artists and/or Charles Dickens. (Slavia, look at that amazing jacket!) She's kind to my neophyte Russian usage styles and links to other frequent travelers. mylifeinheels - Owned by two law school gals, this blog is a vehicle for girlfriends to learn about legal writing. Reviews of student papers, too. hesemom - Hear! Hear! She is using a lot of good language but knows not how to corral it into her entire life. This Bostonian writes about living and writing in her own "melancholy world," raising a son on her own, and striving for personal contentment. She makes me feel better. singlefinger - One of my most-liked blogs. Excellent grammar, beautiful writing, and lots of pics. I honestly think it's driven by a nice guy too - I'm not sure how much time he has for blogging. Plus, he lives in Italy. shotgun magnum - I am a Cajun bitch and have a serious crush on this (mostly) young woman from Louisiana. Even I can find her passionate writings entertaining, as well as charmingly written. What up with those metaphors? Sew Advice - This blog is probably my most-flagged blog because I love the technical blogger who describes herself as a "crafty
